

PROFESSIONALLIFE STYLESHOOT

AI-Powered Lifestyle Photoshoot
Insta-ready, No Studio Needed.

PROBLEM

Real-world lifestyle photoshoots demand lots of resources: photographer, models/subjects, location/studio, lighting, props, wardrobe.

High cost + complex logistics make it impractical for many –

especially individuals, small creators/brands.

SOLUTION

A full-stack web application where users simply describe their vision and get professional-style lifestyle images – no studio, no logistics.

Enables instant prototyping, image generation, upload /

customization, and portfolio-ready output.

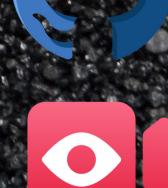

TECH STACK

Frontend: Next.js + React + TypeScript

UI / Styling: Tailwind CSS + shadcn/ui

Auth & User Management: Clerk
(NextJS integration)

Database: Prisma ORM (with a relational DB like PostgreSQL via DATABASE_URL)
